"A biography of Farouk Shousha"

Farouk Shousha is one of the most famous people who worked in the media. Farouk Shousha is a well known radio presenter. He was born in Damietta in 1936. He went to Cairo University. He graduated in 1956. He worked as a radio and TV presenter. He liked poetry and Arabic literature. He presented many programmes on the radio. In his programmes he used to talk about the Arabic Language. For this reason people called him the guardian of the Arabic Language. He helped many young people in the field of media. He used to give them advice on their work. I think he is a good model for young people to follow.

"A review about global warming"

Global warming is one of the most dangerous problems. It has bad effects on our environment. It can lead to floods because of the melting ice. In some areas, there would be more drought and killing of many species of plants and animals. There are many reasons for this problem. Pollution is the main reason for global warming. Cutting down trees and forests can also cause global warming. From here we must find solutions to this dangerous problem. Firstly, we should stop making pollution. Secondly, we must start planting more and more trees. If we did that, we would help our environment to be a good place for people, animals and plants to live.

"A story you have read"

Recently, I have read a wonderful story. The story was called "Black Beauty". It was written by a writer called "Anna Sewell". The main character in the story was a horse called Black Beauty. It told us the story of horses and their life. Black Beauty had difficult life. He worked for many people. Some of them were good. Other people were very bad. Black Beauty was a kind horse. He was also beautiful and strong. The story teaches us about animals and how hard they worked. This story had many morals. The writer wanted to teach us that we should treat animals well and be kind to them.

Read the following text, then answer the questions

Greed is one of the worst qualities. It leads to losing everything. Once there was a dog who wandered in the streets night and day. He was looking for food. One day, he found a big juicy bone. He was very happy. He grabbed it between his mouth and decided to go home. On his way home, he crossed a river. When he looked at the water, He saw himself. He thought it was another dog with a bone. He wanted that bone for himself too. When he opened his mouth, the bone fell into the river and sank. That night, he went home hungry. This story teaches us that if you are greedy, you will lose what you have.

Writing

1. Write ONE HUNDRED AN TEN (110) words on:

" A review of Natural wonders of Egypt"

Egypt has a lot of natural wonders. People should know about them in order to visit them. The most famous natural wonders are the White Desert National Park, Al Nayzak Lake and Gebel Elba. The White Desert National Park is an amazing place because it contains five oases with rocks. It is a wonder because the colours of the rocks change and look beautiful. Al Nayzak Lake is called the Shooting Star. It has the shape of an eye. It is one of the best places to dive and swim. Gebel Elba is a national park. Although it is a desert land, it is unusually green and home to many animals and birds.

2. Write ONE HUNDRED AN TEN (110) words on:

" Different habitats "

There are many different habitats around the world. These habitats are important for the life of people and animals on Earth. The main habitats are Coastal, Grassland, wetland and polar habitat. The Coastal habitat is found along the coast of the sea. The grassland habitat is usually found between mountains and deserts. It is a home of some animals. The wetland habitat is often covered by water. The polar habitats are found at the top and bottom of the Earth. They are covered by ice. They are the habitats of polar bears. The temperature there is freezing. Without these habitats, some animals would disappear from Earth.

out of the window but he couldn't see anything. He heard the voice again.
He thought that one of the neighbors' boys had climbed a tree and
couldn't get down. He took his torch and walked to the garden. He
searched it very well, but he couldn't find anybody. Finally, he thought
that someone was playing a trick on him. So he went back to the house.
As soon as he sat down, he heard the sound from behind him. It was
sitting on the bookshelf, a large green and red bird. It was a parrot.

Writing

1. Write ONE HUNDRED AN TEN (110) words on:

"A review of things we can recycle"

Recycling things has become one of the most important things these days. We should start recycling because it is a good way to help our planet. There are many things we can recycle. We can recycle paper, plastic, water and other things. If we recycle paper, we will avoid cutting more trees. This will help to reduce pollution. We can recycle water to use it again for growing plants and washing cars. Plastic objects can be recycled. We can use the recycled plastic again for making many things such as bags and bottles. We can recycle cotton and wool to make clothes. To conclude, recycling is very important for both people and the environment.

"How to reduce global warming"

Global warming is one of the most dangerous problems that all countries around the world have. It affects all countries and all habitats. We should do our best to find solutions to this problem. There are a lot of things we can do. Firstly, we should plant more trees. Trees help to increase oxygen and reduce pollution. Secondly, we should recycle rubbish instead of putting it in landfill sites. If we do that, there will be fewer gases. Thirdly, we should reduce our use of fossil fuels such as oil and gas. They cause much pollution. We should start using renewable sources of energy. They are clean and don't pollute the environment.

3. Read the following text, then answer the questions (6 M)

Tourists have come to Egypt for hundreds of years to see the wonders of the ancient world such as the pyramids, temples and other monuments. It is a wonderful experience for them. Tourists have also come to experience the wonderful natural world such as the desert and the Red Sea.

There are a lot of activities to do by the Red Sea. Some people love relaxing on the beach, while others like doing something more exciting like snorkelling. Snorkelling has been popular for many years and people have come to Egypt to swim in the Red Sea for a long time. Dahab has been a popular destination since 1960. This is because the water in Dahab is among the best in the world for snorkelling. There are beautiful coral reefs and there are some amazing sea animals, such as the dugong and the lionfish. We have to encourage and welcome tourists to visit Egypt in the future.

Writing

"A review of climate change"

Climate change is one of the worst problems that we face. All countries around the world suffer from this problem. There are many reasons for climate change. The main reason is pollution. Pollution produce gases that make the temperature of the earth get higher and higher. Another reason is cutting down trees. Although it is a dangerous problem, it is easy to solve it. We should reduce the amount of pollution. We should stop using fossil fuels. We should use renewable sources of energy that don't cause pollution. We must stop deforestation. We should plant more trees along streets. If we do that, we will solve this problem easily.

"A review of a green initiative"

There is a green initiative in Africa called the Great Green Wall. This initiative started in 2007 by the African Union. The aim of the initiative is to solve the problem of deforestation. The Great Green Wall initiative will plant millions of trees, seedlings and plants across Africa from east to west. This will create a growing green landscape. When they finish planting the trees, the wall will be 8.000 km long. The initiative will have a lot of good results. It will create jobs for people. It will help farmers grow more crops. In addition to that, it'll also help to reduce the problems of climate change.

"A review of forms of renewable energy"

Renewable energy is the best form of energy that we use these days. It is good for the environment. There are many forms of renewable energy. They are solar energy, wind power and hydroelectric. The energy from the sun is called solar energy. The wind can be used to make electricity. We use wind turbines to make electricity. We can use water to make electricity. This form is called hydroelectric. We must use these forms of energy instead of fossil fuels for many reasons. They are green. They are cheap and continue for a long time. I mean they are reusable. All countries now have started using all these forms of energy.

Writing

1. Write ONE HUNDRED AN TEN (110) words on:

"The importance of satellites"

Satellites have become very important all over the world. We have used satellites for many things we do every day. We use it for GPS, weather reports, TV and the internet and mobiles phones. GPS is used to show us the way. We use satellites for weather reports. Satellites allow us to study the weather. They show how clouds and storms are moving. We also use satellites for TV and the internet. Lots of people have satellite TV so that they can watch their favourite shows and sports matches. Satellites are used in mobile phones. Satellite phones can work anywhere in the world. They are very useful in places far from cities, such as on mountains or in deserts.

2. Write ONE HUNDRED AN TEN (110) words on:

"A biography of Farouk EI - Baz"

Farouk EI - Baz is one of the most important scientists in the world. Farouk EI-Baz is an Egyptian American space scientist and geologist. He worked with NASA in the scientific exploration of the Moon and the planning of the Apollo program. He is one of the most important scientists who had done a lot of research before the first man walked on the moon. He helped astronauts to land on the moon. He gave advice to astronauts to collect the rock on the moon. He has studied deserts. He used satellites to find underground water in the desert. His work has helped a lot of countries to find water.

Writing

"A review about your personal goals and ambitions"

It is important to have goals and ambitions. It is important to work hard to achieve them. I have a lot of goals and ambitions. When I leave Preparatory school, I'd like to go to a technology school. My dream is to become a robotics engineer. I have other goals. I want to work as a volunteer for a charity. I want to meet new people. I want to improve my skills, so I want to join an online course. When I finish my university, I am going to get an internship. After that I will set up my own business. I will have a company that will make robots.

"A review about a future technology"

In the future, there will be some forms of technology. These forms will affect our future. One of them is driverless cars. Driverless cars will help us travel to travel anywhere without touching the controls. They will depend on electricity. They will be better for the environment. Some experts believe that we will have to wait until2030 to use these cars. Although they driverless cars have a lot of pros, they have some problems. They need a lot of testing to be safe to use. We will have to make new laws. We also will have to make our roads better. We need change road sings so that computer can read them well.

Egypt has a lot of natural wonders. These natural wonders can't be seen in other places all over the world. The Kharga Oasis is one of Egypt's natural wonders. It is surrounded by desert, far from the River Nile. It is visited by more and more tourists every year. It is full of date palm trees. These dates can be exported to a lot of other places in addition to selling them in many shops in the local area. People prefer visiting this beautiful oasis because of its wonderful wonders. In The Kharga Oasis, we can buy a lot of things such as baskets, shoes, and furniture. These all things are made from dates. It's the best place to visit.

Egypt has a lot of natural wonders. These natural wonders can't be seen in other places all over the world. I visited Al Nayzak Beach and Gebel Elba last summer. Al Nayzak Beach is an amazing natural wonder. I give it five stars. It is called the Shooting Star by the locals. Al-Nayzak Lake is famous for its pure water. The lake attracts hundreds of tourists from all over the world, where they are able to dive and swim due to its safe, clean water. Gebel Elba, which is surrounded only by green fields, is one of Egypt's most wonderful places. The Gebel Elba National Park is in the south-east of the country. I highly recommend visiting it.

"A review of mongooses"

There are a lot of kinds of mongooses in the world. A mongoose has a long body, with short legs and a long tail. Their bodies are covered by thick fur.

Mongooses can see and hear very well, which helps them to find food and avoid danger. They are famous for fighting snakes. They are able to kill snakes by biting them. There are a lot of mongooses in Africa, Asia and parts of Europe. It lives in forests, wetlands or grasslands, under the ground or rocks. They also eat birds, frogs, lizards, seeds, eggs and nuts. Unfortunately, mongooses are endangered, mainly because of deforestation and loss of habitat.

Black Beauty

"Black Beauty" is a children's book by Anna Sewell. A horse named Black
Beauty is the main character of the book. In this book, the horse tells a story about
his own life and experiences. When Beauty is four years old, Farmer Grey trains
him to carry people on his back and pull carriages. When he gets older, he is sold
to Squire Gordon at Birtwick Park. This is where he gets his name "Black Beauty"
because he was a beautiful black horse with a white star on his head. Black Beauty
meets many people, the kind and the cruel. He also makes new friends. We learn
from this story to treat animals well because they have feelings like us.

Our planet is in danger and I think this is because of some global issues. One of these dangerous problems that endanger our planet is cutting trees! Trees are a important for our life. They give out oxygen and take in carbon dioxide. We get most of our materials in life from trees like wood, paper, fruits, seeds... etc. Trees are cut to make more space for building houses or hotels. They are cut to get and sell more of their wood and this is a big mistake. Killing a source of life will lead to more and more global problems such as global warming, deforestation and desertification. We should control that by planting more trees.

We all enjoy having new mobile phones. Mobile phones are made from many dangerous materials and these materials are of course destroying the environment. Man depends greatly on plastic on his life. Plastic is an enemy for the environment. Plastic is very difficult to be removed. It damages the sea life too. It cannot be burnt underground. No one can deny that it is not easy to make mobile phones. They need to have a lot of important materials inside them like plastic, iron and glass. When we throw away a phone, these materials can be very bad for the environment. If we stop throwing away old materials, we will benefit our environment.

Man has created a lot of things that benefit him but are bad to nature. Man is the main reason for destroying nature and making pollution. Pollution is caused by greenhouse gases such as carbon dioxide. These are made when we burn fossil fuels such as oil. Also, pollution is created by cutting down trees. When we cut down trees, the carbon dioxide stays in the air. The best solution to stop pollution is that we have to depend on cleaner renewable energy such as solar energy and wind power. We must start recycling more rubbish. We must stop cutting down trees and forests. Finally, both the government and people should encourage planting more trees either in streets or at homes.

Clean air is important to our health. There are many things we can do to help reduce air pollution and make air cleaner. Use buses and trains instead of cars, as they can carry a lot more people in one journey. Walking or cycling is better than using a vehicle, as it does not create any pollution. Most energy is produced by the burning of fossil fuels, like coal, oil and gas, which creates carbon dioxide, a greenhouse gas. All of that means that small changes in our daily routine can make a difference in the quality of the air we breathe. I think it's our role to teach the new children how to keep air cleaner and how to save the environment.

Last summer, I read an advertisement about a three-day holiday in Sharm El Sheikh. The idea was new because I had never stayed in a hotel before. In fact, I enjoyed the journey from the very recent time. The hotel was fantastic and the service was very good. Moreover, the city is very beautiful. It has a lot of activities. I enjoyed the sea and the water sports. I went snorkelling and saw the coral reefs. I also visited Dahab and Ras Mohamed National Park which has rare kinds of fish. The one and only disadvantage of this journey was the long distance as the journey look about seven hours but I recommend visiting Sharm El-Sheikh one day.

There are a lot of sources of energy. In my opinion, electricity is the most important source of energy that can be produced from other sources of energy, like coal, natural gas, oil, and nuclear power. The energy sources we use to make electricity can be renewable or non-renewable, but electricity itself is neither renewable nor non-renewable. Electricity plays an essential part in our society today. It is used in our hospitals, banks, homes, and cars. I think we couldn't live without it. Some of the stations run on the power of fire and steam, while others run on the power of the wind or falling water. Some even use the power of the sun alone to create electricity. Although there are many different ways of getting electricity, we should save it.

I can protect my environment. It is time to fight for a better future and a clean protected environment. What we can do to our environment is much! We can stop dumping rubbish in streets. We can stop dropping waste in rivers. We can stop using bad-fuel cars. We must control our complete dependence on fossil fuels to reduce carbon dioxide. It is necessary to plant more trees and save electricity. Using air conditions takes too much electricity. We can turn off lights and computers after using them. At the end, I'd like to say that using recycled materials is a good solution to reduce pollution and keep our environment clean.

Desertification has become a great problem many countries suffer from and we must find a solution to it. Desertification happens when green land becomes desert. The Great Green Wall is an initiative set up in 2007 by the African Union to solve the problem of desertification in the Sahel region of Africa. Sahel region suffers from droughts. The Great Green Wall will plant millions of trees and plants across Africa to create a growing green landscape. It will create jobs for 10 million people. The trees and plants will improve the land for farming again. This will help in creating a clean environment and reducing desertification.

Go Green

The initiative "Go Green" starts as part of the National Sustainable

Development Plan "Egypt 2030". It aims to change behaviors, and encourage
people especially young people to protect the environment, natural resources and
sea life. The initiative is set up by the Ministry of Environment. It also raises
awareness on the importance of waste recycling, food and energy saving and air
pollution reduction. Go Green Initiative's main goal is to create great opportunities
for development. Go Green provides simple, everyday actions you can take to
reduce your carbon footprint, make our great city more sustainable in the future
and help our community. In my opinion, it's a wonderful initiative and we should
encourage people to support it.

Ayman Ragab is an Egyptian scientist who has always been interested in space science. Ayman is from the village of al-Dababiya near Luxor and graduated in Engineering from Aswan University. Ayman Ragab entered the competition that NASA started it to ask the world's best scientists to try and find a solution for the rubbish that space journeys produce. Ragab came second in 2019. He suggested using jets of air to make the waste smaller and then help to recycle it. Since he won his prize, he has worked on NASA's Technology Transfer Project which looks at how to use the latest technology in space, and he has recently found ways to save energy when there is little gravity.

We couldn't live without satellite technology! If we had not discovered space, we would not have known a lot of the world secrets! Satellites allow us to study the weather all around the world. Lots of people have satellite TV so that they can watch their favourite shows and sports matches. Satellite phones can work anywhere in the world. Before satellites were invented, people had always used maps to find their way. Now most people use GPS. We have GPS in cars, on phones and even in some modern motorbike helmets. I see that we should spend more and more money to explore more and more about space to know a lot of the universe secrets.

The International Space Station is a place where astronauts live and work when they go into space. It orbits the earth every day. It's one of the brightest objects in the sky and it can be seen without using a telescope. Life on the Space Station is different from life on earth in many ways. In space, washing, sleeping and eating can be difficult! Although life is difficult and different on space, communication is not a problem. Astronauts can send emails or make phone calls to their families and friends. Technology has made it more and more easy for astronauts not to suffer during their travel and stay in space stations. They now find remedies for most side effects that the previous astronauts have complained about.

A biography of Dr Farouk El-Baz

Dr Farouk El-Baz was born in Zagazig, on January 2, 1938. He's is an Egyptian space scientist. He is a great scientist and a geologist. After studying the moon, Farouk started studying deserts on earth. He worked with NASA on exploring the moon and the planning of the Apollo programme. He used satellites to find rivers that were under the sand, and this work has helped Egypt and other countries to find new water. Before this work, Dr El-Baz had also helped to develop special cameras on the space shuttle. He is married. He has four daughters, and six grandchildren. Now, El-Baz is the Research Professor and Director of the Center for Remote Sensing at Boston University in Boston.!

A review of social media

Social media has become the main source of news. These days 68% of people who have internet access get their news from social media. Although this means that we can find news easily and get regular updates on our phones. In my opinion, I think that social media has a negative impact on news and society. News, which is often bad, can make people stressed and worried. Furthermore, not everything we read or see on social media is true. If we share it, before checking the facts, we might spread false information. In turn, this means that the public stops trusting journalists and news in general.

We now live in the age of open skies and media. Life has changed a lot from the past even in our choice of careers. Before now, there were journalists, newsreaders and writers but today, there are bloggers and youtubers! I'd like to be a famous youtuber. I always have groups of new and inventive ideas. I can make my own channel on YouTube application and if I succeeded, I would have a large number of views and of course I would get a lot of money. On the other hand, I cannot deny that social media has also brought some disadvantages. To sum up, I'd like to say that for every plus, there is a minus. We should decrease the negative sides and increase the positive ones.

Farouk Shousha was born on January 9th, 1936. He was an Egyptian poet. He presented the popular television program Oumsiya Thaqafiya "Cultural Evening" from 1977 through 2006. Shousha was born in Damietta, where he went to Kuttab. Shousha read poetry in his free time. He began reading Arabic poetry at the local library, where he read everything from the pre-Islamic period through modern poets. Shousha joined Dar al-Ulum, where he was known as the Students' Poet. After he had graduated, he began working as a radio presenter. He became the head of Egyptian Radio. Then he moved to the television and was named "the guardians of the language". He died on October 14, 2016.

Safia El Mohandes was the first female voice on the radio. Safia was born in 1922 in Cairo. Her father was a famous linguist. He encouraged Safia to read Arabic books and novels. Safia also studied English literature at the university and graduated from the Faculty of Arts in 1945. In 1947, Safia joined the Egyptian radio, and she was the first female radio presenter. Safia presented programmes for women and for children. Her most famous programme, 'Housewives, presented news, educational advice and drama for the whole Egyptian family. Safia was very kind and helpful to all radio broadcasters. She helped everyone, and so she was called 'the mother of all broadcasters'. Safia was head of the radio broadcasting from 1975 until she retired in 1982.

Honesty is the main quality in the job of the journalist. The job of a journalist is not an easy one. It needs hard work all around the day. This sometimes requires sleeplessness. Meeting different people and finding out more about the world is a main part of the job. The job includes spending long time on the internet and talking to people on the phone too. Unfortunately, there are some journalists who give fake news and report on unreal facts to attract more readers and earn more money. This is a misuse for the job of a journalist. Finally, I'd like to say that honesty is the most important characteristic that remarks any job.

Before now, the learning process depended on books, blackboards and classrooms. In fact, the process develops all the time, came after that the whiteboard, CDs and DVDs. Next, came the educational programmes and the smart boards. Today, we are in the age of online learning. The educational platforms have controlled the learning process. I think, in the near future, the computer and the robots will develop thinking! Computers may choose what suit the mentality and the age of the learner. And they will decide on the quality and the quantity of the curriculum. To sum up, I'd like to say no one can predict where technology will lead us!

To achieve your goal is to reach your dream job. My dream job is to become a famous writer. From the early age, I loved reading stories and its reviews. Writing is a talent that requires special skills, so I started to take a course during the summer vacation. The year after the course, I joined a writing competition in my school and came the second. After I finish my school, I hope I will join the Faculty of Arts and study at the press department. My role model is Naguib Mahfouz. At the end, I'd like to say if you have a goal, you must work for it.

PREP. 3

A review of future homes

Technological development is a never-ending process. Every day technology offers us surprises that appear at first amazing and as soon as time passes it becomes a part of history. I think future homes will be connected to the internet and our mobile phones. I think technological applications will have a great role at home. There will be an application that adjusts the temperature so we will of course dispense with air conditioning. There will be an application that cooks meals. I think there will be also an application that washes clothes and dishes. Technology may not surprise us if it develops an application for teaching our children instead of schools and teachers!

In the future, driverless cars will change all of our lives. We will be able to travel anywhere without touching the controls or even looking at the road!

Driverless cars will also be better for the environment because they will be electric. However, there are still some problems. Car companies will have to do lots of testing to make sure that the cars are completely safe. We will also have to make new laws and we might even have to change some of our road signs so that the cars computers can read them. Some experts believe that we will have to wait until 2030. Of course, it's impossible to know who is correct, but we can be sure of one thing: driverless cars will be part of our future.

How cities will be like in the future? By 2050, cities' services will increase. The internet will be the main service which will make the city smart. Cities will become greener and have more cycle lanes and walking space, along with less pollution. Buildings will produce their own energy from renewable sources and their design will be improved. Buildings will also get their energy sources through solar panels and wind turbines. Cities will have houses for all people, but they will also have big parks. The trees and other plants will give us clean air, and also give a home to animals and birds. People will grow their own food in gardens on roofs.

My friend Karim has enjoyed windsurfing for about two years. He usually goes with his older brother. A few months ago, he decided to windsurf alone. He did not tell his brother this. It was windy, but that is good if you want to windsurf. In the afternoon, the wind suddenly became very strong. The wind took Karim far from the beach. He was very scared. Some people in a boat came to help Karim. After that, they took him back to the beach. Karim has not windsurfed alone since that time. Now, he always windsurfs with an older person. He has learnt an important lesson!

PRED. 3

My favourite story is Heidi. Heidi is the story of an orphan girl. She is a beautiful girl. She goes to live with her grandfather in Switzerland. Her grandfather is an old man. He lives in a small house in the mountains and he has lots of goats. Heidi sleeps in a bed in the attic of the house. She drinks goat's milk and eats bread and cheese. Every day she walks in the mountains with the goats, her grandfather and her friend, Peter. She sees birds and flowers. She is very happy! But one day, Heidi's aunt arrives and takes her to the city. Heidi doesn't like the city and she is very sad to be away from her grandfather, Peter and the goats. Heidi has lots of adventures in the city.

I have enjoyed windsurfing for many years. I usually go with my father. One day, I decided to go alone. I did not tell my father about that. The weather was good for windsurfing. I enjoyed my time very much. In the afternoon, the wind suddenly became very strong. The wind took me far from the beach. I was very scared. I was lucky when some people on a boat saw me. They came to help me. They took me back to the beach. My dad was angry with me. I apologized and learnt that I should go with an older person. It was a bad day in my life.

There are many kinds of sports. The most common sports are football, basketball, volleyball, tennis, skiing, swimming and cycling. Sports have great value in our life. They are very important for keeping us healthy. People who are used to practising sports usually enjoy good health. They are always active and do their jobs well. Sports are a good way of spending our spare time. Sports help us gain good qualities such as patience, cooperation and how to face difficult problems and situations. Sports teach us good manners and develop our character. Some sports help us to defend ourselves such as karate and judo. In fact, sports are very essential for us.

Read the following text, then answer the questions (6 M)

Tourists have come to Egypt for hundreds of years to see the wonders of the ancient world such as the pyramids, temples and other monuments. It is a wonderful experience for them. Tourists have also come to experience the wonderful natural world such as the desert and the Red Sea.

There are a lot of activities to do by the Red Sea. Some people love relaxing on the beach, while others like doing something more exciting like snorkelling. Snorkelling has been popular for many years and people have come to Egypt to swim in the Red Sea for a long time. Dahab has been a popular destination since 1960. This is because the water in Dahab is among the best in the world for snorkelling. There are beautiful coral reefs and there are some amazing sea animals, such as the dugong and the lionfish. We have to encourage and welcome tourists to visit Egypt in the future.
